MR. PERLEY AT OTTAWA.

Our representative in the Dominion House of Commons, Mr. W. D. Perley, made a good impression by the delivery of his maiden speech in the House. He has made his presence felt there, and his constitnents will be pleased to hear good reports of him. An eastern paper has spoken of him as one of the giants in stature, and another as the best looking man in the House. The Ottawa correspondent of the Winnipeg Merning Call refers to some of the things he has been doing as follows:

Mr. Perley, in moving for a re-turn of land sold by the Canadian Pacific in the Territories, made his maiden speech and was ·loudly ap-He said no return was alled for more important to the Northwest than this. The land being sold were in many cases disposed of to large companies and as their names were not made public they could not be taxed. He did not wish to abate a jot of the rights of the Canadian Pacific, but once lands were sold by them, the owner, be they land companies or indiciduals, date Moosomin? We think not. should not be allowed to escape the just share of taxation.

Mr. Perley and Mr. Grandy, a gentleman largely interested in Assiniboia, waited upon Sir John a while to-day regarding the extension of the Canadian Pacific Southwestern branch into the Souris district. Petitions received from that locality were received and forwarded to Sir George Stephen with Sir John's personal request to use every effort to construct the road to meet the wants of the settlers, Mr. Perley arranged for an interview with Mr. Van Horne, and he and Mr. Grandy will go to Montreal in a few days to see him and Sir Geo. Stephens, Mr. Grandy is very confident of the result of the mission.

A wonderful correspondent writes to the Fert Qu'Appelle Vidette in reference to a case tried in a magistrates' Court in Qu'Appelle recently, and in his letter maliciously markes falume, it is not necessary to go into cision of the magistrates, three sitting on the case, is generally thought to be as near right as possible. As the anonymous writer has assailed a justice of the peace in his character as a public officer we to print over a matter searcely

placed at the mercy of such men, as they have in many instances to trust blindly in the integrity of their correspondents, and in that way frequently publish letters that would not find a place in their columns were all the facts known to them. This we assume is the extent of the Vidette's responsibility i publishing the letter. The writer closes with several "wonders" in whic hinisinuations are made against the editor of THE PROGRESS. He tries to create the impression that we were paid to suppress the publication of the particulars of the case and the fact that it was tried in Qu'Appelle. Such a despicable insinuation is only worthy of a man who being evil himself sees evil in others. It is one of our rules not to publish the proceedings of magistrates' courts, as the publication of the details of the petty quarrels, scandals and vices of a community serve no good purpose, and only tend to lower the tone of the public press. Let the scandal monger publish his name if he dare.

DISALLOWANCE QUESTION (Montreal Gazette.)

The temporary excitement of the cople of Manitoba over the Hudson's Railway enterprise having aubsided interest in the subject of disallowance of local railway charters have been revived. Politicians have been revived. Politicians mostly are at the bottom of the agitation and stimulated indignation of the Manitobans at their exclusion from independent connection with railways south of the boundary line, although it may be admitted that the salubrious climate of the North-West causes them to do whatsoever they undertake with a vigour quite novel in the east, and that lack alike of knowledge or consideration of this question of disallowance, has given them a prejudical view of its merits and a grossly exaggerated estimate of its importance. The politicians tell the people that in the absence of com-petive lines to the south immigrants cannot be had, and that the Britisher or German leaving Europe to seek a home in the new West will prefer Dakota, Minnesota, and that great Western Territory of our neighbors to Manitoba, so long as the system of dis-allowance is persisted in. That argument has been employed to rouse indiguant protests on every platform in the prairie province, and can be met constantly in the laberal press of the east; yet what does it imply? Nothing less than that Manitoba is unable to compete with the country to the south of the boundary for the emigration of the old world, that in respect of soil and climate and the rewards for labor, it has no such tractions as Minnesota and Dakota at present. That is the one logical conclusion of the assertion that the disallowance policy retards the growth of population, if it can be established that the rate of transportation in Manitoba, the cost of reaching the grain markets is less than in the States south of the line. For our own part we not, of course, seek to imply that the soil or climate of Masitoba is inferior to that of Dakota and Minnesota; and we believe these to be distinctly superior for the purpose of wheat growing, and knowing the transportation rates to be less than prevail south, we conclude that when the politician, whether in the east or the west tells the people that they are being rained by the prac tice of disallowing railway charters, and that they will all be compelled to move across the boundary unless the Dominion Government reverses its policy, the politician—in the zeal of the part zan in ignorance or in pure cus-ed-ness, it matters not which—misrepresents the facts and creates an opinion abroad wholly erroneous and calculated to do much misshief to Manitoba. Before the proposition that American railways shall be allowed to tap

its being favourably entertained, it must be conclusively demonstrated that the people of Manitoba are suffering grave injustice and ha d hip under the existing conditions. The people of the east-merchants, manufactures, importers and the taxpayers generally are certainly entitled to some consideration in this matter, to have continued a policy that fosters inter-provincial trade and gives a market in the west to the products of the east. We are glad to observe that even the people of Ainnipeg have sufficient mental befance left to recognize that the east has some claim to consideration, that they profess openly no desire to trade with St. Paul and Chicago, indeed have no thought of doing so, and regard it as a fair ar rangement that keeps to the people whose money largely built it, the direct and indirect advantages of the trade pened up by the Canadian Pacific The railway company itself s entitled to consideration in the interest, not merely of those who had the luck to put their money in it, but ed in the vigorous management and substantial prosperity of the road. What we said a year ago on this questo unute the provinces of the Domini n sible wreck the road, because not only would have been, to the Welland and consolidate the trade of a country does the Canadian Pacific threaten Canal and the government could have wirthy of notice, and it is a pity a Several of the death schicucas passwhich extends from the western testhe the traffic of the Norshern Pacific and provided ample protection withins the Manitoba rankays in the near 48 hours.

Given time to place the whole system is operation, to develop traffic, provide feeders in the shape of branch lines, establish steamships. on the Pacific and acquire a str and vigorous growth, and not only can the construction of railways in Manitoba connecting with the An can systems be permitted without de-triment to the best interests of the Dominion, but the Canadian Pacific will itself enter the Northwestern States as

a competitor for traffic.

We have said that in order to make their case good, those who clamour for the abandoument of the disallowance must show that the rates for transpor-tation established by the Canadian Pacific Railway are unduly high, and t is significant that no attempt in this direction has been made. How low, relatively, to those of railways in States south of the boundary, are the rates of the Canadian Pacific Railway, a few illustrations will show, the figures being taken from the tariffs issued in April of this year. Taking rates for equal destances on the Canadian Pacific and Northern Pacific roads, we have this contrast :

the trade of the Canadi in Pacific Rail. It is to be added that the Northern Pacific figures are based on their special grain tariff, which applies only for 600 miles, and on their local distances tariff for greater distances, and that the St. Paul and Manitoba figures for the shorter distances are those of their special grain tariff, which applies only for 514 miles. An examination of these rates will show that the people of Manifoba and the North West pay much less for transportation of their grain than do those of Dakota and Minnesota, and that the politicans who declare that unless disallowance is abando ed the settlers in Canada's North-West will have to cross the boundry, are perverters of the truth.

OTTAWA GOSSIP.

The session will be much shorter than at first anticipated and will, un less prolonged fac ious opposition, close about the 10th cr 15th of June,

Replying to Mr. Edgar, Sir John aid the Dominion had asked the Imperial government to contribute an annual subsidy of £60,000 on condition that Canada would pay one-fourth of it, for a Pacific mail service between Hong Kong and Vancouver, but that no decision was arrived at

Prof. Sauaders has just completed the sending out of five hundred and fifty small bags of Russia wheat to Manitoba and the Northwest. Es bag contains three pounds, and in the fall a report from each person having received the grain is expected. Use ful results are anticipated.

Motion to abolish the office of Deputy Speaker, there was a short debate and the motion was defeated by 67 to and the motion was defeated by 67 to 109 on a strict party vote. Watson voted yea; Daly, Ross, Scarth, Mandowall, Davis and Davin, nay. Of the bolters Cimon alone voted with the Opposition, and Girouard. "Gilbout, Desjardines, Coursal, Bergeron, Dupont, Audet, Duchesney and Conture with the Government: It was claimed that Dovon had paired. He exed that Doyon had paired. He explained he forgot and withdrew his vote, leaving the vote 66 to 109, a majority of 43. The result was received with loud applause. If Moffatt had not been dead the majority would have been 44 as claimed by Sir John. Blake gave vent to his chagrin and the house adjourned.

The Hon. Gilbert McMicken, of Winnipeg, returned last week from a trip to Ottawa. On his return he was interviewed by a Sun reporter, and

the following is part of the result :
"But," said Mr. McMicken, "there in the is not the slightest objection world to the province building the line. I can state confidently that not even remonstration on the part of the Dominion government would follow such an action by our local government. I do not even think the C. P. R. would interferein such an event. No doubt the Dominion government pro nised to head off all lines by disallowing the charters, but it would not for a moment interfere if the provincial government were to build the line

itself. "I talkedthe matter over fully with practical railway men while I was east," continued Mr. McMicken, and I find it would not be such an expensive undertaking as many surmise. I obmined figures from them, and, at the very outside, the cutire cost of grading, ironing, ballasting, bridging and equipping in first-class style would not exceed \$750,000. If the line were kept an independent one, as designed, instead or one road coming into the province, half a dozen or more would come, and there would not be the slightest doubt but that the road would pay, and pay well under judicious management. It would not be necessary for the government to pay an enormous price for the building of the road. The contract could be given to some responsible firm, and the cost registered within bounds. The estimate I have mentioned would be sufficient to grade a road wide enough for two tracks, the second to be added when the traffic warranted

While at Ottawa Mr. McMicken learned some good tidings in regard to the Hudson's Bay Railway. He came across wealthy English capitalists who had been been holding back until their minds were satisfied as to certain imaginary objections, which they had removed recently on having definite assurances in regard to the matter They were now ready to embark their capital in the enterprise, believing in its success. Mr. McMicken now

Mr. McMicken said he had learned natural would op while east, on undoubted nuthority, that Sir John Macdonald was to be raised to the House of Lords, in England, on the 21st of next an . He had been asked some time ago if he would accept the honor, and as he was becoming too old for the worry of active political life entailed on a leading party, he had signified his willingness to accept, and he would retire from Canadian politics in a couple of months. The leadership, Mr. McMicken said, would devolve npon Sir Charles Tupper, who was preparing for the task. He was making himself just as affable as possible in all quarters, and was taking a very mild and conciliatory course in the House. Mr. McMicken said he had learned that it was also the intention of the Imperial authorities to raise Sir John Rose, now in England, to the peeruge. Such an elevation had been offered him by Mr. Gladstone while he was in office, but had been refused for certain political

In remaining unarmed, while every great nation around ber has been arming to the teeth, England has a far acted wisely; she has accumulated resources that, after a little preparation and disaster, perhaps would enable her to strike an overwhelming blow in case her position should ever be seriously thre tened but it is doubtful how far she can safely pursue this course; the European influence gained by her in the Napoleonic Wars has now pretty well run out. "From the dispensation which thus finally set out the territorial groundwork of modern Europe [the Treaty of Vienna]," says Mr. Wier, "England could only receive permis-sion to retain Malta, Heligoland, the Cape of Good Hope, Guiana, Mauritius, and a few other of its conquerts, while it was entrusted with the protection, or rather temporary domin of the Republic of the Ioman Isles. But what material aggrandisement an insular character obliged it to forego was fully equalled by prestige and moral influence which its fortitude and efforts had deservedly earned. Having entered into conflict with a reputation blemished by the mishap of the latter part of last century, Great Britain had emerged as a heroic example for all Continental peoples. It had won that respect which for long was to give weight to unarmed utterance ; and it was only bare conformity with its recent tutelary conduct that the last act of the English Government, before withdrawing from active participation in Continental affairs, was to chastise the Algerian corsairs, who had abstained from attacking British commerce in order to prey the more securely upon these marines which had been deprived of protection by the fortunes of naval war." The The stock of credit accumulated by England in the great war is now exhausted; perhaps the wisest plan is to wait as she is till more can be Europe has not seen the last of its great wars .- The Week.

We fail to see with the Globe any "discomfiture" of Sir John in the Home Rule and anti-Coercion vote. As Sir John objected, a similar expression of opinion had before been addressed by the Dominion House to Mr. Gladstone, who had replied that the matter was in the exclusive province of Her Majesty's Government and that Her Majesty would take advice from Her Imperial advisers. This ought to have stopped any further action in the Dominion Parhament, who are not responsible advisers of Her Majesty with respect to Irish affairs. He therefore with the minority against the resolutions, some of the other members of the Cabinet voting with him, some against. If more had voted with him, jucluding Mr. Blake and other members of the Opposition, Parliament would have been spared the snubbing it has already received at the hands of the English Press. The "discomfit-ure" which will certainly ensue when the resolutions are presented to the Imperial Government will not fall on Sir John, but on those politicans who, to make party capital and ingratiate themselves with the Irish voters, have not hesitated to import an element of discord into Canadian politics, while doing their best to render the Imperial Government dissatisfied with Canada, and possibly antagonistic to her interests.—The Week

Russia is slowly, but surely, getting a firm foothold in Afghan an every day. A short time ago the Ameer det ranned to make his government equ. ly supreme in all parts of the councy, and establish a uniform system of laws and civil administration. The most barbarous tribes objected to this, because it threatened to deprive F. Li. Col. ER, capital in the enterprise, believing this, necause it threated to depin this, necause it the depin this, necause it threated to depin this dependence it threated to depin this dependence it threated to depend the dependence it threated to depend chiefly would oppose any system them amendable to the law, hence the resistance to the Ameer's authority. The Russians in Turkistan saw an opportunity not to be lost sight of, so agents were sen among the Ghilzais to encourage them in their revolt. They were supplied with the means to carry on the flict, and promised Russian aid in cas the Ameer should prove too strong for them. By such tactics Russia has succeeded in spreading rebellion over nearly one-half of Afghanistan.

-We regret that by an unintentional oversight we omitted last week any reference to the lecture and music were excellent. The following was the pogram: Anthem "One thing have I desired," by the choir: prayer by Rev. A. Hamilton: Duett, "Vesper bella," Mrs. Bulyea and Miss Allen; violin solo, Mr. Neshit; chairman's address; the lecture; song, "Three maids of Lee," and encore "Simon the cellerer," Mr. A. Sutherland; variations on the flute, by Mr. H. Walker; clos-ing with the National Authem." The evening's entertainment as a whole was never surpassed for excellence in Qu'Appelle, and great credit is due Mrs. Bulyea for the effort put forth to furnish such an acceptable program. Under her direction the Methodist choir has b come very efficient.

-The official quarterly meeting of the Methodist church of this circuit was held here on Saturday last. The resignation of Mr. R. Hammond as a trustee was accepted and Mr. Fred. Hodgson appointed in his stead. Mr. James Weidman was elected to represent the board at the district meeting. The number of stewards for next year was fixed at seven. The board adjourned till the last Monday in May at 16 o'clock.

LOST BY FIRE.

On Saturday last the stables and rainery of Mr. Wesley Bell, who day. About goon a freight went lives about ten miles south of Mc-west, and contrary to orders the Lean Station, took fire, it is supposengine driver left open the screen ed from a spark, as there was no of his smoke-stack, and a spark fire around the place. Both stables and grainery were burned to the ground together with a very fine mere he brought out from Ontario, and the well known Young Prince of Wales, also about forty bushels of oats and a small quantity of wheat. He had a new set of heavy team harness in the stable at the time. One of his neighbor's horses and harness were also burned, having been left there while he went over to Mr. Brown's on an errand, but could not get bock in time to save them Mr. Bell was plowing in a field close by the stable, but did not notice anything until he turned round at the far end of the field, but could not get there in time to save the horses. He burst in the door and found that the stallion had broken his halter and was lying on "Climbing" by Rev. A. Andrews, at the door dead the mare was lying delivered in the Methodist church in her stall dead also. All he saved on the 29th ult. Dr. Edwards was was his wagon and a load of hay Extras he drew away himself just in time. Mr . Bell has the heart felt sympathy of his friends and neighbors in his heavy loss.

WHITEWOOD.

-The foliage surrounding this attractive town is just bursting into leaf, which adds greatly to the charm of its natural situation.

-The brickyard of John Street is in full blast and is turning out a very superior quality of brick and in large quanities as fast as five men can manipalate them.

-New buildings in town are being erected by the following: Murdock Gillis, Myles McArthur, W. E. Knowler and J. A. Brecker. The Woodbine Hotel is near completed.

-St. Mary's Parish church. special meeting was convened last Friday respecting the building of the clergyman's house and the extension to the church, and the final steps arranged. The Rev. G. B. Childs is now in residence.

-The farmers of this district are engaged in potato planting. They have had a splendid seeding time and the copious showers which fell on Thursday last and on the Friday previous have had a splendid effect, every thing points to be a good harvest, and the spirits of everyone are light in consequence.

-Mr. Marshallsay, member of the Board of Education for the Northwest Territories, attended the meeting of the Protestant School of the Board of Regina on Friday last. The points brought forward at that meeting were the duration of Provincial Certificates, and the low average attendance of school in rural districts.

MINING DISASTER.

Vancouver, B. C., May 3.—An ex-plosion occurred in the Vancouver coal company's mine at Nanaimo to day. There were 150 men in the mine at the time and it is feared a great many are kuled. Ten bodies have been recovered and a large rescuing party is at work. The excitement is intense and wild cries are heard from those whose relatives or friends are entombed.

LATER REPORT

Nanaimo, B. C., May 8 .- A terrible explosion occurred in No. 1 shaft of the Vancouver coal mine, a few minutes before 18 o'clock this evening. There are supposed to be about one bundred men in the mine. At this hour, midnight, twelve bodies have been taken out. Some are dead, some seriously wounded, and others fatally hurt. Little hopes are entertained of party went but were unable to do much as they were overcome by black damp and were obliged to One of the rescuing party, S. Huston died shortly after coming out. The over the air shafts completely destroy-The fire engine was brought out and well manned and saved the adjoining buildings. The scene around the shaft is heartrending.

May 5 .- Men have been working all night fighting the fire in the mine Powerful streams of water are pumped on the fire, and it will be go under control by this evening! til the fice is envirely out no effort oan be made to clear the mine of the after damp, as it would drive it on the fire, and a more frightful explosion than before would occur. Thirty-six bodies were discovered in one heap this morning. These will be brought up soon. Twenty-four are white men and twelve are Chinamen. lt is almost impossible to conceive the misery of this city. Aid will be badly needed as most of the families are left destitute. There are 47 widows and 147 fatherless children left.

20th day of May next, at 2 p.m., for the purpose of receiving the Directors report, electing a Board of Directors for the ensuing year and the consideration of the Society's business generally.

By order of the Board,

LESLIE GORDON, Sec. Qu'Appelle, April 28, 1887.

To the Electors of the Qu'Appelle District.

GENTLEMEN,—
At the request of a large number of the Electors from different parts of the District, and having received the unanimous rote of a public meeting held at Fort Qu'Appelle, for the purpose of selecting a Candidate to fill the vacancy in the Northwest Council, onused by the resignation of Mr. Perley, I have consented to offer myself for your support to fill that important position.

If you do me the honor to elect me as your representative, it will be a pleasant duty, on uny part, to serve you to the best of my ability, and I shall endeavor always to promote the best interests of the whole District, without projudice to any particular locality.

cality.

Having been a resident of the Qu'Appelle Valley since 1881, and always actively engaged in business since that time, my experience will, I trust, recommend itself to your avorable consideration.

The re-division of the District is, I believe

The re-division of the District is, I believe, one of the most important matters that will be brought forward at the next session of the Council. I deem it of vital importance that the re-division should be consumated at the earliest possible moment in order to give more complete representation to the settlers, many of whom are at present unjustly deprived of their franchise. Gentlemen, in order to obtain this end, in the event of my being elected, I pledge myself to resign the seat (which otherwise holds good for two years) as soon as proper legislation in the matter is effected.

As it will be impossible for me to see all

matter is effected.

As it will be impossible for me to see all
the Electors individually before the day of
election, I take this oppyrtunity of soliciting
your votes end influence at the polls.

I have the honor to be,

W. SUTHERLAND.
